

*It's all about learning.*

# TEQ-W6989M Projector

## **User's Manual (concise)**

Thank you for purchasing this projector. Please read through this manual to ensure proper safety and operation.

### **WARNING**

- Before using this product, be sure to read the entire manual. After reading the manual, store it in a safe place for future reference.
- Heed all the warnings and cautions in the manual or on the product.
- Follow all the instructions in the manual or on the product.

### **NOTE**

In this manual, unless any comments are accompanied, "the manuals" means all the documents provided with this product, and "the product" means this projector and all the accessories came with the projector.

# INTRODUCTION

## Warnings

The following entries and graphical symbols are used for the manuals and the product, for safety purposes. Please know their meanings beforehand, and heed them.

**WARNING** This entry has a risk of serious personal injury or even death.

**CAUTION** This entry has a risk of personal injury or physical damage.

**NOTICE** This entry notices a fear of causing trouble.

## Important Safety Instruction

The following are important instructions for safely using the product. Be sure to follow them always when handling the product. The manufacturer assumes no responsibility for any damage caused by mishandling the product, beyond normal usage defined in these manuals of this projector.

### **WARNING**

- Never use the product in or after an abnormality (ex. smoke, strange smell, foreign liquid or object lodged inside, malfunction, etc.) If an abnormality should occur, unplug the projector immediately.
- Situate the product away from children and pets.
- Unplug the projector from the power outlet if the projector is not being used for an extended period.
- Do not open or remove any portion of the product, unless the manuals direct it. For internal maintenance, contact Teq.
- Only use the accessories specified or recommended by Teq.
- Do not modify the projector or accessories.
- Do not let any objects or liquids get inside the product.
- Do not wet the product.
- Do not place the projector where any oils, such as cooking or machine oil, are used. Oil may harm the product, resulting in malfunction, or falling from the mounted position.
- Do not apply a shock or pressure to this product.
  - Do not place the product on an unstable place such as an uneven surface.
  - Remove all the attachments, including the power cord and cables, when carrying the projector.
- Do not look into the lens and the openings on the projector, while the lamp is on.
- Do not approach the lamp cover and the exhaust vents while the projection lamp is on. After the lamp goes out, do not touch it until the projector cooled sufficiently.

## **REGULATORY NOTICES**

---

### **About Electro-Magnetic Interference**

#### **IN CANADA**

This Class B digital apparatus complies with Canadian ICES-003.

#### **IN THE US AND OTHER PLACES WHERE THE FCC REGULATIONS ARE APPLICABLE**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult Teq or an experienced radio/TV technician for help.

#### **Instructions to Users**

Some cables have to be used with the core set. Use the accessory cable or a designated type cable for the connection. For cables that have a core only at one end, connect the core to the projector.

#### **CAUTION**

Unapproved changes or modifications may void the user's authority to operate the equipment.

## **REGULATORY NOTICES (continued)**

### **About Waste Electrical and Electronic Equipment**

The mark is in compliance with the Waste Electrical and Electronic Equipment Directive 2002/96/EC (WEEE). You must dispose the equipment, including any spent or discarded batteries or accumulators, as unsorted municipal waste. Use the return and collection systems available. If the batteries or accumulators included with this equipment display the chemical symbol Hg, Cd, or Pb, it means the battery has a heavy metal content of more than 0.0005% Mercury, or more than, 0.002% Cadmium, or more than 0.004% Lead.

### **CONTENTS OF PACKAGE**

Your projector should come with the items shown below. Make sure all the items are included.

Contact Teq immediately if any items are missing.

(1) Remote control with the two AA batteries

(2) Power cord

(3) Computer cable

(4) Lens cover

(5) Security label

(6) Application CD

### **NOTE**

Keep all original packing materials for future reshipment. Be sure to use the original packing materials when moving the projector. Use special caution for the lens.

## **PREPARATIONS**

### **Loading batteries into the remote control**

Please insert the batteries into the remote control before use. If the remote control starts to malfunction, try replacing the batteries. If you will not use the remote control for an extended period, remove the batteries and store them in a safe place.

1. Hold the hook part of the battery cover to remove it.

2. Align and insert the two AA batteries (HITACHI MAXELL, Part No.LR6 or R6P) according to their plus and minus terminals as indicated in the remote control.

3. Replace the battery cover in the direction of the arrow, and snap it back into place.

#### **WARNING**

Always handle the batteries with care and use them only as directed. Improper use may result in battery explosion, cracking or leakage, which may result in fire, injury and/or pollution of the surrounding environment.

- When replacing the batteries, replace both of the batteries with new batteries of the same type. Do not use a new battery with a used battery.
- Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Keep a battery away from children and pets.
- Do not recharge, short circuit, solder or disassemble a battery.
- Do not place a battery in a fire or water. Keep batteries in a dark, cool and dry place.
- If you observe battery leakage, wipe out the leakage and then replace a battery. If the leakage adheres to your body or clothes, rinse well with water immediately.
- Obey the local laws on disposing the battery.

## ARRANGEMENT

Refer to the illustrations and tables below to determine screen size and projection distance. The values shown in the table are calculated for a full size screen: 1280 x 800

### (H) X (V) Screen Size

- a : Projection distance  
 (±10%, from the projector's end)  
 (b), (c) : Screen height (±10%)

#### On a horizontal surface

#### Suspended from the ceiling

- Keep a space of 30 cm or more between the sides of the projector and other objects such as walls. Do not place or attach anything that will block the lens or vent holes.
- In the case of a special installation, such as on the wall or ceiling, the specified mounting accessories (17) and service may be required.

16:10 screen										
Type (inch)	Screen size		Projection distance			Screen height				
	(H) (m)	(V) (m)	@ (min.) (inch)		@ (max.) (inch)		@ (cm)		(inch)	(cm)
	(m)	(m)	(m)	(inch)	(m)	(inch)	(cm)	(inch)	(cm)	(inch)

## **ARRANGEMENT (continued)**

---

### **WARNING**

- Install the projector in a stable horizontal position.
- Place the projector in a cool place, and make sure that there is sufficient ventilation. Do not place the projector where the air from an air conditioner or similar unit will blow on it directly.
- Do not place the projector anywhere where it may get wet.
- Use only the mounting accessories the manufacturer specified, and leave installing and removing the projector with the mounting accessories to Teq.
- Read and keep the user's manual in a safe place.

### **CAUTION**

- Avoid placing the projector in a smoky, humid or dusty place.
- Position the projector to prevent light from directly hitting the projector's remote sensor.

## CONNECTING YOUR DEVICES

Be sure to read the manuals for devices before connecting them to the projector. Make sure all the devices are suitable to be connected with this product, and prepare the cables required to connect. Please refer to the following illustrations:

- When AUTO is selected for the **COMPUTER IN1** or **COMPUTER IN2** port in **COMPUTER IN** of the INPUT menu, that port will accept component video signals.
- To use the projector's network functions, connect the **LAN** port to the computer's LAN port, or to an access point that is connected to the computer with wireless LAN, using a LAN cable.

- If you insert a USB storage device, such as a USB memory drive, into the **USB TYPE A** port and select the port as the input source, you can view images stored in the device.
- You can connect a dynamic microphone to the **MIC** port with a 3.5 mm mini-plug. In this case, the built-in speaker will output the sound from the microphone, even while the sound from the projector is output.

## CONNECTING YOUR DEVICES (continued)

### WARNING

- Only use the appropriate accessories. Otherwise, it may cause a fire or damage to the device and the projector.
  - Only use the accessories specified or recommended by the projector's manufacturer. Consult Teq when the required accessory did not come with the product or the accessory is damaged. It may be regulated under some standard.
  - For a cable with a core at only one end, connect the end with the core to the projector. That may be required by EMI regulations.
  - Do not disassemble or modify the projector or the accessories.
  - Do not use a damaged accessory. Be careful not to damage the accessories. Route a cable so that it is neither stepped on nor pinched out.

### CAUTION

- Do not turn the projector on or off while it is connected to a device in operation, unless it is indicated in the manual.
- Be careful not to mistakenly connect a connector to a wrong port.
- Before connecting the projector to a network, be sure to obtain the consent of the administrator of the network.
- Do not connect the **LAN** port to any network that might have excessive voltage.
- Before removing the USB storage device from the port of the projector, be sure to use the REMOVE USB function on the thumbnail screen to secure your data.

### NOTE

- If a loud feedback noise is produced from the speaker, move the microphone away from the speaker. This projector does not support plug-in power for the microphone.

## CONNECTING POWER SUPPLY

1. Put the connector of the power cord into the **AC IN** (AC inlet) of the projector.
2. Firmly plug the power cord into the outlet. After a few seconds, the **POWER** indicator will light steady orange.

Please remember that when the DIRECT POWER ON function is activated, the connection of the power supply will turn on the projector.

### WARNING

- Please use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.
- Only use the power cord that came with the projector. If it is damaged, consult Teq to get a new one.
- Only plug the power cord into an outlet that matches the voltage of the power cord. The power outlet should be close to the projector and easily accessible. Remove the power cord for complete separation.
- Never modify the power cord.

## TURNING ON THE POWER

1. Make sure the power cord is firmly and correctly connected to the projector and the outlet.
2. Make sure the **POWER** indicator is steady orange. Then remove the lens cover.
3. Press the **STANDBY/ON** button on the projector or the remote control.

The projection lamp will light up and the **POWER** indicator will begin blinking in green. When the power is completely on, the indicator will stop blinking and light steady green.

### WARNING

- A strong light will emit when the projector's power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector's openings.

### NOTE

- Please power on the projector prior to the connected devices.
- The projector has the DIRECT POWER ON function, which automatically turn on the projector.

## ADJUSTING THE PROJECTOR'S ELEVATOR

When the projector surface is uneven, use the elevator feet to adjust the projector horizontally.

The feet can also adjust the screen angle by, elevating the front side of the projector within 14 degrees. This projector has 2 elevator feet and 2 elevator buttons. An elevator foot can be adjusted by pushing the elevator button on the same side.

1. Hold the projector and push the elevator buttons to loosen the feet.
2. Position the front side of the projector to the desired height.
3. Release the elevator buttons to lock the feet.
4. After making sure the elevator feet are locked, put the projector down gently.
5. If necessary, the elevator feet can be manually twisted to make more precise adjustments. Hold the projector when twisting the feet.

To loosen an elevator foot, push the elevator button on the same side.

Twist the foot, to finely adjust.

### CAUTION

- Do not handle the elevator buttons without holding the projector, since the projector may drop down.
- Do not tilt the projector more than 14 degrees. A tilt exceeding the restriction may shorten the lifetime of the projector itself, or cause a malfunction.

## DISPLAYING THE PICTURE

1. Activate your signal source. Turn on the signal source on, and make it send the signal to the projector.
2. Use the **VOLUME + / VOLUME -** buttons to adjust the volume. To silence the projector, press the **MUTE** button on the remote control.
3. Press the **INPUT** button on the projector. Each time you press the button, the projector will switch its input port. You can also use the remote control to select an input signal. Press the **VIDEO** button to select an input signal from the **HDMI, COMPONENT (Y, Cb/Pb, Cr/Pr), S-VIDEO** or **VIDEO** port, or the **COMPUTER** button to select an input signal from the **COMPUTER IN1, COMPUTER IN2, LAN, USB TYPE A** or **USB TYPE B** port.
4. Press the **ASPECT** button on the remote control. Each time you press the button, the projector will switch the mode for aspect ratio.
5. Use the zoom ring to adjust the screen size.
6. Use the focus ring to focus the picture.

### CAUTION

- If you wish to have a blank screen while the projector's lamp is on, use one of methods below:
- Use the supplied lens cover.
- Use the BLANK function (see "Operating Guide").
- Taking any other action may cause the damage to the projector.

### NOTE

- The ASPECT button will not work without the proper signal.

\*For the details about how to adjust the picture, please see "Operating Guide".

## TURNING OFF THE POWER

1. Press the **STANDBY/ON** button on the projector or the remote control. The message "Power off?" will appear on the screen for about 5 seconds.
2. Press the **STANDBY/ON** button again when the message appears. The projector lamp will go off, and the **POWER** indicator will begin blinking in orange. Then the **POWER** indicator will stop blinking and light in steady orange when the lamp cooling is complete.
3. Attach the lens cover, after the **POWER** indicator turns steady orange.

Do not turn on the projector for about 10 minutes or more after turning it off. Also, do not turn off the projector shortly after turning it on. Such operations may shorten the lifetime of some parts or cause a malfunction.

### **WARNING**

- Do not touch around the lamp cover or the exhaust vents during use or just after use.
- Remove the power cord for complete separation. The power outlet should be close to the projector and easily accessible.

### **NOTE**

- Please power off all connected devices before powering off the projector.
- This projector has a AUTO POWER OFF function that can make the projector turn off automatically. \*For more information, please see "Operating Guide."

## REPLACING THE LAMP

A lamp has a finite product life. Using the lamp for long periods of time may cause the pictures to darken or compromise the color tone. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. Preparation of a new lamp and early replacement are recommended. To prepare a new lamp, make contact Teq with the lamp type number:

### Type number : DT01021

1. Turn off the projector, and unplug the power cord. Allow the projector to cool for at least 45 minutes.
2. Prepare a new lamp. If the projector is mounted on a wall or ceiling or if the lamp has broken, ask Teq to replace the lamp.

### In case of replacement by yourself, follow the following procedure.

3. Loosen the screw (marked by arrow) of the lamp cover and then slide and lift the lamp cover to the side to remove it.
4. Loosen the 3 screws (marked by arrow) of the lamp, and slowly pick up the lamp by the handles. Never loosen any other screws.
5. Insert the new lamp, and firmly retighten the 3 screws of the lamp that were loosened in the previous process to lock it in place.
6. While putting the interlocking parts of the lamp cover and the projector together, slide the lamp cover back in place. Then firmly fasten the screw of the lamp cover.
7. Turn on the projector and reset the lamp time using the LAMP TIME item in the OPTION menu.

- (1) Press the **MENU** button to display a menu.
- (2) Point at the ADVANCED MENU in the menu using the **▼/▲** button, then press the **▶** button.
- (3) Point at the OPTION in the left column of the menu using the **▼/▲** button, then press the **▶** button.
- (4) Point at the LAMP TIME using the **▼/▲** button, then press the **▶** button. A dialog will appear.
- (5) Press the **▶** button to select "OK" on the dialog. This will reset the lamp time.

### CAUTION

- Do not touch any inner space of the projector while the lamp is out.

### NOTE

- Only reset the lamp time when you have replaced the lamp.

## REPLACING THE LAMP (continued)

HIGH VOLTAGE    HIGH TEMPERATURE    HIGH PRESSURE

### WARNING

- The projector uses a high-pressure mercury glass lamp. The lamp can break or burn out if jolted or scratched, handled while hot, or worn over time. Note that each lamp has a different lifetime, and some may burst or burn out soon after use. In addition, if the bulb bursts, it is possible for shards of glass to fly into the lamp housing, and for gas containing mercury and dust containing fine particles of glass to escape from the projector's vent holes.
- **About disposal of a lamp:** This product contains a mercury lamp; do not put it in a trash. Dispose of it in accordance with environmental laws.
- For lamp recycling, go to [www.lamprecycle.org](http://www.lamprecycle.org) (in the US).
- For product disposal, consult your local government agency or [www.eiae.org](http://www.eiae.org) (in the US) or [www.epsc.ca](http://www.epsc.ca) (in Canada). For more information, ask Teq.

Disconnect  
the plug  
from the  
power  
outlet

- If the lamp should break (it will make a loud bang when it does), unplug the power cord from the outlet, and make sure to request a replacement lamp from Teq. Note that shards of glass could damage the projector's internals, or cause injury during handling, so please do not try to clean the projector or replace the lamp yourself.

- Never unscrew anything except the appointed (marked by an arrow) screws.
- Do not open the lamp cover while the projector is mounted on a wall or ceiling. This is dangerous, since if the lamp's bulb has broken, shards of glass will fall out when the cover is opened. Working in high places is dangerous, so ask Teq to have the lamp replaced, even if the bulb is not broken.
- Do not use the projector with the lamp cover removed. At the lamp replacing, make sure that the screws are screwed in firmly. Loose screws could result in damage or injury.

- Only use the lamp of the specified type. Use of a lamp that does not meet the lamp specifications for this model may cause a fire, damage or shorten the life of this product.
- If the lamp breaks soon after the first time it is used, it is possible there are electrical problems. If this happens, consult Teq.
- Handle with care: jolting or scratching could cause the lamp bulb to burst during use.
- Using the lamp for long periods of time, may cause it to darken, burn out, or to burst. When the pictures appear dark, or when the color tone is poor, please replace the lamp as soon as possible. Do not use old (used) lamps; this is a cause of breakage.

## CLEANING AND REPLACING THE AIR FILTER

Please check and clean the air filter periodically. When the indicators or a message prompts you to clean the air filter, comply with it as soon as possible. If the filters are damaged or heavily soiled, replace them with the new ones. To prepare the new filters, contact Teq with the following type number:

### Type number : MU06481 (Filter set)

When you replace the lamp, please replace the air filter. An air filter of specified type will come together with a replacement lamp for this projector.

1. Turn off the projector, and unplug the power cord. Allow the projector to sufficiently cool down.
2. Use a vacuum cleaner on and around the filter cover.
3. While supporting the projector with one hand, use your other hand to pull the filter cover forward in the direction of the arrow.
4. Use a vacuum cleaner for the filter vent of the projector and the outer side of the filter unit.
5. Take the filters out while holding the filter cover.
6. Use a vacuum cleaner on both sides of the filters. Hold the meshed filter while vacuuming the filter. If the filters are damaged or heavily soiled, replace them with the new ones.
7. Put the filters back into the filter cover. Put the coarse meshed filter into a filter cover first. Then put the fine meshed filter on the coarse meshed one, turning its stitched side up.
8. Put the filter unit back into the projector.
9. Turn on the projector and reset the filter time using the FILTER TIME item in the EASY MENU.
  - (1) Press the **MENU** button to display a menu.
  - (2) Point at the FILTER TIME using the **▼/▲** button, then press the **▶** button. A dialog will appear.
  - (3) Press the **▶** button to select “OK” on the dialog. This will reset the filter time.

## CLEANING AND REPLACING THE AIR FILTER (continued)

### **WARNING**

- Before taking care of the air filter, make sure the power cable is not plugged in. Then, allow the projector to cool sufficiently.
- Only use the air filter of the specified type. Do not use the projector without the air filter or the filter cover. It may result in a fire or malfunction to the projector.
- Clean the air filter periodically. If the air filter becomes clogged by dust or the like, internal temperatures will rise and may cause a fire, burn or projector malfunction.

### **NOTE**

- Only reset the filter time when you have cleaned or replaced the air filter.
- The projector may display the message such as the “CHECK THE AIR FLOW” or turn off the projector, to prevent the internal heat level rising.

## **REPLACING THE INTERNAL CLOCK BATTERY**

This projector has an internal clock that uses a battery. When the clock of the network function does not work correctly, please try replacing the battery.

**HITACHI MAXELL**, part number **CR2032** or **CR2032H**.

1. Turn off the projector, and unplug the power cord.  
Allow the projector to cool sufficiently.
2. After the projector has cooled adequately, slowly turn over the projector so that the bottom is facing.
3. Turn the battery cover in the direction indicated "OPEN" using a coin or the like, and pick the cover up to remove it.
4. Pry up the battery using a flathead screwdriver or the like to take it out. While prying it up, lightly put a finger on the battery, since it may pop out of the holder.
5. Replace the battery with a new **HITACHI MAXELL**, Part No. **CR2032** or **CR2032H**. Slide the battery under the plastic claw and push it into the holder until it clicks.
6. Replace the battery cover in place, then turn it in the direction indicated "CLOSE".

### **NOTE**

- The internal clock will be initialized by removing the battery.

### **WARNING**

- Be careful handling a battery, as a battery may cause explosion, cracking or leakage, which may result in a fire, an injury and environment pollution.
- Only use the specified and perfect battery. Do not use a battery with damage, such as a scratch, a dent, rust or leakage.
- When replacing a battery, always replace it with a new one.
- If a battery leaks, wipe the leakage out well with a waste cloth. If the leakage adheres to your body, immediately rinse it well with water. If a battery leaks in the battery holder, replace the batteries after wiping the leakage.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Do not work on a battery; for example recharging or soldering.
- Keep a battery in a dark, cool and dry place. Never expose a battery to a fire or water.
- Keep a battery away from children and pets. If swallowed, consult a physician immediately for emergency treatment.
- Obey the local laws on disposing a battery.

## SPECIFICATIONS

Item	Specification	
Product name	Liquid crystal projector	
Liquid Crystal Panel	1,024,000 pixels (1280 horizontal x 800 vertical)	
Lamp	210 W UHP	
Speaker	16 W mono (8 W x 2)	
Power supply/Rated current	AC 100-120V/3.4A, AC 220-240V/1.8A	
Power consumption	AC 100-120V:330 W, AC 220-240V:310W	
Temperature range	5 ~ 35°C (Operating)	
Size	317 (W) x 98 (H) x 288 (D) mm * Not including protruding parts. Please refer to the following figure:	
Weight (mass)	approx. 3.6 kg

## **TROUBLESHOOTING - WARRANTY AND AFTER-SERVICE**

---

If an abnormal operation (such as smoke, strange odor or excessive sound) should occur, stop using the projector immediately.

Otherwise, if a problem occurs with the projector, first refer to "Troubleshooting" of "Operating Guide" and "Network Guide", and run through the suggested checks. If this does not resolve the problem, please consult your dealer or service company. They will tell you what warranty condition is applied.

Please check the following web address where you may find the latest information for this projector:
